

## A\_S-1W & B\_LS-1W Series

### 1W, FIXED INPUT, ISOLATED & UNREGULATED DUAL/SINGLE OUTPUT DC-DC CONVERTER

#### MODEL SELECTION

#### PRODUCT FEATURES

- High Efficiency up to 84%
- 1KVDC Isolation
- SIP Package
- Internal SMD Construction
- Temperature Range: -40°C ~ +85°C
- No Heat sink Required
- No External Component Required
- Industry Standard Pinout
- RoHS Compliance

#### APPLICATIONS

The A\_S-1W & B\_LS-1W series are specially designed for applications where a group of polar power supplies are isolated from the input power supply in a distributed power supply system on a circuit board.

These products apply to:

- 1) Where the voltage of the input power supply is fixed (voltage variation  $\leq \pm 10\%$ );
- 2) Where isolation is necessary between input and output (isolation voltage  $\leq 1000\text{VDC}$ );
- 3) Where the regulation of the output voltage and the output ripple noise are not demanding.

Such as: purely digital circuits, ordinary low frequency analog circuits, and IGBT power device driving circuits.

## EMC RECOMMENDED CIRCUIT

EMI Recommended External Circuit

(CLASS A):

(Figure 1)

A\_S-1W Series

Recommended external circuit parameters:

Vin: 5V

C1: 4.7μF/50V 1210

Vin: 24V

C1: 1μF/50V 1210

Remarks: Product bare input of 12V、15V can be tested by the CLASS A.

B\_LS-1W Series

Recommended external circuit parameters:

Vin: 3.3V

C1: 4.7μF/50V 1210

Vin: 5V/12V/15V/24V

C1: 1μF/50V 1210

Remarks: Product bare input of 3.3V、5V、12V can be tested by the CLASS A, increase the capacitor margin increase.

## OUTLINE DIMENSIONS, RECOMMENDED FOOTPRINT & PACKAGING

## TEST CONFIGURATIONS

### Input Reflected-Ripple Current Test Setup

Input reflected-ripple current is measured with a inductor Lin and Cin to simulate source impedance.

## DESIGN & APPLY CONSIDERATIONS

### 1) Requirement on output load

To ensure this module can operate efficiently and reliably, During operation, the minimum output load **could not be less than 10% of the full load**. If the actual output power is very small, please connect a resistor with proper resistance at the output end in parallel to increase the load, or use our company's products with a lower rated output power (A\_S -W25/B\_LS-W25 series).

### 2) Overload Protection

Under normal operating conditions, the output circuit of these products has no protection against overload. The simplest method is to connect a self-recovery fuse in series at the input end or add a circuit breaker to the circuit.

#### Input Fuse Selection Guide

3.3VDC Input Models	500mA slow-Blow Type	15VDC Input Models	100mA slow-Blow Type
5VDC Input Models	500mA slow-Blow Type	24VDC Input Models	100mA slow-Blow Type
12VDC Input Models	200mA slow-Blow Type		

### 3) Recommended circuit

If you want to further decrease the input/output ripple, an capacitor filtering network may be connected to the input and output ends of the DC/DC converter, see (Figure 2).

It should also be noted that the capacitance of filter capacitor must be proper. If the capacitance is too big, a startup problem might arise. For every channel of output, provided the safe and reliable operation is ensured, the recommended capacitance of its filter capacitor sees (Table 1).

(Figure 2)

EXTERNAL CAPACITOR TABLE (TABLE 1)

Vin (VDC)	Cin (μF)	Single Vout (VDC)	Cout (μF)	Dual Vout (VDC)	Cout (μF)
3.3/5	4.7	3.3/5/6	10	±5	4.7
12	2.2	7.2/9	4.7	±9	2.2
15	2.2	12	2.2	±12	1
24	1	15	1	±15	0.47
-	-	24	1	±24	0.47

It's not recommended to connect any external capacitor in the application field with less than 0.5 watt output.

### 4) Output Voltage Regulation and Over-voltage Protection Circuit

The simplest device for output voltage regulation, over-voltage and over-current protection is a linear regulator and an capacitor filtering network with overheat protection that is connected to the input or output end in series (Figure 3), the recommended capacitance of its filter capacitor sees (Table 1), linear regulator based on the actual voltage and current to reasonable selection.

(Figure 3)

### 5) No parallel connection or plug and play

Note:

- Operation under minimum load will not damage the converter; However, they may not meet all specification listed, and that will reduce the life of product.
- All specifications measured at Ta=25°C, humidity<75%, nominal input voltage and rated output load unless otherwise specified.
- In this datasheet, all the test methods of indications are based on corporate standards.
- Only typical models listed, other models may be different, please contact our technical person for more details.
- Our company offer custom products.
- Specifications subject to change without notice.
