## Casambi Cloud Gateway installation guide

Add Cloud Gateway to network 1/2

08:34 🗟 🖻 🕅 🔹 CASAMBI A My networks Nearby devices Show demo 0

Open the Casambi app. You need the Beta version of the app to use the Cloud Gateway.

#### Go to My networks

to select the network you want to add the gateway to. The gateway can be only connected to one network at a time. Log in to the network that you want to add the Cloud Gateway to.

You can now view and edit the notifications and data collection under Settings.

Set up a WiFi connection by selecting **Configure WiFi** under Settings

You will need to enter the SSID and Password for the WiFi you wish to use.

The Cloud gateway is now connected to the WiFi.

The gateway is now all set up for use with the selected network.

Tap on the gateway that you want to add to your network. Internal

Internal

Removing the Cloud gateway from use in the selected network

Tap on the trash can icon to remove the gateway from the network.

A pop-up will appear to enable the removal of the gateway. Tap on Ok to remove it or on Cancel to cancel the removal.

The gateway status now shows that the Cloud Gateway is no longer connected to the selected network. The Cloud gateway can now be again taken into use in any network.
