X MOMENT

Make your home even smarter with our **X MOMENT Voice casambi gateway**. Conveniently control all casambi-ready lights and systems using **X MOMENT** and Amazon Alexa.

Across rooms, all lights can now be controlled individually using your self-created voice commands or with your casambi app. Here, the **X MOMENT** controls groups and scenes with your individually created voice commands to control lights in the office, in the Living room, kitchen or bathroom or around any Casambi device, individually dimmed, on or off.

The estol **X MOMENT** is the only Voice Casambi Gateway on the market that allows you to control your lighting atmosphere individually by means of your voice.

In addition, you can now access your lighting scenes or other casambi-ready devices (e.g. blinds) worldwide via your cell phone using the voice function, e.g. to simulate your presence on vacation.

There is no smarter and more convenient way to call up relaxed lighting scenes. Our **X MOMENT** is available to you with up to 20 voice commands, depending on the model.

The **X MOMENT** is the smart connection of your intelligent Casambi lighting system. It allows unlimited control of lights and accessories. The **X MOMENT** does not require network cables or complex installation. All you have to do is plug in a 5 V power supply (cell phone power supply) and configure it via your Android or iOS phone.

Control lighting scenes conveniently via your voice - worldwide with our unique **X MOMENT**.
